- Light Source

- Clean, disinfect, sterilize each attachment and cleaning accessory according to its instruction manual.
- Always wear personal protective equipment when cleaning, disinfecting, or sterilizing an endoscope.
- All channels of the endoscope MUST be cleaned and high-level disinfected or sterilized during EVERY reprocessing cycle, even if the channels were not used during the previous patient procedure.
- Decisions regarding what methods of cleaning, disinfection and sterilization should be used are the responsibility of trained specialists.
- When you use detergent solution and disinfectant solution, always follow the manufacturer’s recommendations regarding temperature and soaking time.
